

# TIME'S UP!

Playing Time's Up! with your friends and family while social distancing is now possible with this new variant! Meet online in two groups of at least two people and play over video calls!

Each player will team up with another player in a different room. Players on the same team can use accessories (clothing, objects) in the same color to easily recognize their teammate(s).

*The game plays using the normal Time's Up! rules with the exception of the following adjustments:*

## REQUIRED COMPONENTS

- One copy of Time's Up! (Party or Family) per room
- One video camera per room

## SETUP

In each room, deal 20 cards equally between the players. Each player secretly looks at their cards. If they don't like one of them, they may exchange it with a new card. Then, make a single deck per room and shuffle it. There should now be 2 decks of 20 cards in each room, so 40 cards total. Time to start the game!

## GAMEPLAY

Players are always on a team with a player **in the other room**. The player giving clues turns over their timer and their opponent (in the same room as them) is in charge of watching it.

Players A and C are on Team 1 while players B and D are on Team 2. **Player order** is as follows: A, B, C, D.

When a deck is empty, only the players in the other room will give clues. The round ends when both decks are empty.
